AREA OF EXPERTISE

As an Associate for Colliers International, Brian specialized in tenant representation for healthcare clients in the Twin Cities area, working closely with senior brokers to provide exceptional service and market knowledge to his clients.

Utilizing his real estate and market knowledge, Brian most recently created an extensive database of medical buildings and clinical systems in the metro area. His team is now working directly with the company's research department to begin tracking medical office activity to better assist their clients with space selections.

A recent graduate from the University of Minnesota, Brian earned his Bachelor's Degree in Economics, with minors in Business Management and Chinese Languages & Literatures. He gained corporate and real estate experience through his previous internship and assistant positions with the Minneapolis office of Colliers International (formerly NAI Welsh).

COMMUNITY INVOLVEMENT

Outside of the office, Brian also participated in activities with Young Professionals of Minneapolis, the University of Minnesota Alumni Association (UMAA), and Alpha Kappa Psi Twin Cities Alumni Chapter.
