AREA OF EXPERTISE

Dan Peterson advises clients in the purchase, sale and leasing of office and industrial properties. With over 23 years of business experience in multiple industries, Dan applies a wide range of market and business knowledge to all his client assignments.

Dan has spent the last nine years working as a Commercial Real Estate Advisor. He has experience as a broker, developer, consultant and property inspector. Dan is an active member of MNCAR and is a CCIM candidate. Prior to commercial real estate, Dan worked as a professional consultant for clients such as Medtronic, 3M, Wells Fargo, and US Bank. Dan has helped create an internationally distributed clothing business, managed a textile printing business and headed up sales for a medical animator and design agency.

ACCOMPLISHMENTS

After the untimely shutdown of a regional agricultural plastics recycler, Dan led a 15-month search across two states to find a new property for his client. Dan was able to present options on both facility and strategic partner fronts while keeping the changing requirements and multiple options in play. The result was a new 100,000 square-foot facility for a clean tech company with an economically advantageous lease.
