Jennifer Nuetzman CAD Technician, Genesis Architecture

As a CAD Technician for Genesis Architecture, Jennifer Nuetzman is responsible for creating computer generated drawings for all phases of design, including as-built verification, design, and construction documents. Jennifer specializes in tenant improvement space planning for office, office/warehouse, and industrial commercial projects.

Education and Training

- Hennepin Technical College

Since joining Genesis Architecture, Jennifer has completed drawings for the 43,764 SF American Pre-Clinical Services building in Coon Rapids, the 44,774 SF Sanus Systems building in Roseville, and two Trane facilities totaling 23,557 SF in St. Paul. Prior to joining Genesis Architecture in 2004, Jennifer spent 2 years with Jafvert Mueller Architects.

Jennifer's strong attention to detail and exceptional organization skills make her ideally suited to create the elaborate, technical documents required in building and space design.
